SMX

SMX Accelerate

Email security & archiving for Office 365

SMX provides a next generation email and security platform, giving you unrivalled reliability, user-friendliness and powerful features to make email management more secure, efficient, and scalable.

So, how does your company's email security rate?

Here's how working with SMX is...

- We provide a managed migration of legacy/ on-premises archives to a unified Azure-based archival system, maintaining data sovereignty and compliance obligations.

- Our industry leading anti-abuse engines are layered to provide the highest-level security filter, which is also adaptable so we can detect, adjust and pre-empt specific security threats.

- Our security systems are targeted at the Australasian threat landscape, maintaining a level of filtering which is focused on global and local threats.

- It's not some out-of-the-box product – our solutions can be tailored ideally to your company or organisation needs.

- We're accessible – we have skilled, local staff on hand when you need them.

Archiving
Secure, scalable, reliable – provisioned through Microsoft Azure

Analytics
Access and analyse powerful reports in minutes

Management
Manage your users, rules and data in one place

Security
Detect and protect against sophisticated threats

"I would absolutely recommend SMX to other businesses. It's a powerful tool, and east to manage. And we don't have to invest a lot of time or resources to manage it – it pretty much looks after itself. It just works."

– **Reyna Ramirez Montes**
Security & Compliance Manager
Genesis Energy

SMX email archive on Azure
