

Email Admin Portal

Seamless, Centralised Email Management for Email Service Providers

SMX Email Admin Portal provides top level email security, management and migration to thoroughly take care of your customer accounts and data. Our service gives you the ultimate assurance your customers email data is protected, management is simple, and support is accessible when you need it.

Main Benefits for Users:

- Mailbox Administration - The Email Admin Portal Mailbox View provides real-time administration of user mailboxes.
- Mail Tracking - The Email Admin Portal Mail Search feature, allows administrators to track the delivery of all email in and out of the platform.
- Integration - The Email Admin Portal provides Service Providers with a fully featured, comprehensively documented API available
- For third party development teams; providing provisioning, support/administration and report integration capabilities.
- Reporting - The Email Admin Portal Reporting Module provides out of the box reporting and dashboard functionality.
- Delivery of usage data for third party email protection services - Allows the management of denial rules, track and protect against ransomware, spoofing, phishing and denial of service attacks.
- Multi Tenanted - A design architecture that allows for multiple user groups to be deployed and managed across a single platform.
- MAC Auditability - Moves adds and changes notes and history are captured and are available at mailbox level
- Multiple Deployment Options - A Linux based systems that is inherently flexible in it's deployment approach i.e. Red Hat, Puppet, etc.

The ultimate assurance that your customers email data is protected, management is simple, and vendor support is accessible when you need it.

An essential single source of account status truth!
